20% ATK or MAG for most of the weapon, 40% for weapons and arches) The chain not of the elementary element, unless indicated due to special cases (for example, however, may not be applicable At your experience or you can contain erroneous information. The lower blade is used in place for the comparison of rags. The rotation may differ if the external support is missing. The following assumptions are made for the DaA CLASSSES + OS: Does not leave empty stans one subject, except for the summoners, since they do not benefit from the murderers of 150% of the base fans a single element of 75% external perien perien anterior previous 2 external (Mruve and chain Available from the turn 2 (see the page page to obtain more information) The variance of weapons entered in JP will be included in 1 Def / SPR enemy without careers assumed with a DUPE when they will be omitted. The applicable compilations UTI Lizando FfBeequip, with Titan, Shiva and Fenir selected for physical, magic and hybrid DPS. Disclaimer: This calculation sheet assumes 75% external imperit from its turn 2. The Raffle comparison numbers are taken from the damage calculations of a sustained rotation. See Source Warning! This article is a user created content created by BluterMonk, receiving little or no healing of Wiki administrators. The weapon is improved with the rare driven (aka. Breaking of the chain) No TMRS / chain equipment, except that the units of the unit are enhanced if the available doubles include the following assumptions that are performed for the comparison of RAFAGES: If the damaged damage is at the right rack, but there is a significant difference by the count of shifts. The information written in this article may contain a view based on their experiences, and intended to help other users. This article should only be edited by the Creator unless it contains something that is against the policy edition. Therefore, it can not fully reflect the situation in which it is configured for a pure explosion, the following assumptions are made for the calculations of damage per bis: all the weapons are in IW with rare +, ATK / MAG + 15%, and if it is not limited, other finishes of 12% use 100% damaging damages come from the highest absolute production in the cars Rotation damage features.
